

NEPOPS — DIGITAL MARKETING

MONTHLY MANAGEMENT REPORT

Field	Detail
Period	September 2026
Area	Marketing — NEPOPS
Responsible supervisor	Prerana Subedi
Clients / projects	Pensiones México · MÉVIAL
Purpose of the report	To report what was done, what results were achieved, how the area evolved compared with the previous month, what is currently in progress, and the objectives for the following month.

Highlighted fields [\[like this\]](#) are pending information to be completed before the report is sent. Figures marked “calc.” are calculated from the reported figures.

Executive summary

- **Volume fell again at Pensiones México:** messages 4,489 → 3,769 (-16.0%), assigned 40 → 22 (-45.0%), closures 8 → 3 (-62.5%).
- **Paid delivery fell at a similar rate:** reach -18.6% and impressions -19.7%. Messages per 1,000 impressions rose slightly (4.37 → 4.57, calc.), so message volume broadly followed delivery.
- **Conversion weakened at both downstream stages:** message → assigned 0.89% → 0.58% and assigned → closure 20.0% → 13.6% (calc.). In August only the first stage had declined.
- **Spend:** [\[September spend \\$ ____ vs. \\$49,520 in August \(____ %\); budget utilisation ____ %\]](#).
- **August's volume objective was met:** at least 40% of July's messages (~2,400) was required; September's 3,769 messages equal 62.2% of July (calc.).
- **Mid-month reset:** from 15 September, campaigns were returned as far as possible to their July geographic and creative configuration. The team observed a significant improvement in message volume afterwards: [\[messages 1–14 Sep ____ vs. 15–30 Sep ____\]](#).
- **Operational issues:** GHL configuration (seven Meta business portfolios could not be managed in one sub-account and were split into four advisor sub-accounts), the PAM page sitting in a personal portfolio, and Retiro Vertical relaunched on 4 September after verification.
- **New campaign:** Prosperar launched in Guadalajara on 21 September.
- **MÉVIAL:** no campaign changes in September. The ad account must be verified before the CTA can be switched to WhatsApp. [\[MÉVIAL September results: ____\]](#)

1. What did we do during September?

Activity indicator	September 2026
Campaigns active / launched	8 in total: 7 at Pensiones México (Pensión 360, Pensionate, Nosotros, Retiro Vertical, Barcco, PAM and Prosperar, launched on 21 Sep) + 1 MÉVIAL campaign.

Activity indicator	September 2026
Videos / Reels	14 in total: 12 for Pensiones México (1 organic) and 2 promotional videos prepared for MÉVIAL. Published: [] · Edited: []
Posts and designs	7 paid posts, 5 carousels and 45 organic posts. [Split by client:]
Other actions	GHL sub-account setup per advisor; new business portfolio and ad account for PAM; restructuring rounds on 4, 15, 21 and 28–29 Sep; Retiro Vertical verification and relaunch; Barcco switched to WhatsApp Business (WABA) on 29 Sep.

Detail of the work carried out

- **Pensiones México — campaign restructuring.** Geographic expansion on 4 Sep, a return to the July configuration on 15 Sep, age range raised to 60–65+ and location refinement on 21 Sep, new Reels on 25 Sep, and new campaigns and ad-set changes on 28–29 Sep.
- **New campaign.** Prosperar launched in Guadalajara on 21 Sep (one circle, one Reel, one post).
- **GHL implementation.** Sub-accounts reorganised into four, one per advisor's Facebook account and business page. Technical help from Andres and Lorgio for a long-term solution.
- **Content production.** 12 videos for Pensiones México, 2 promotional videos for MÉVIAL, 7 paid posts, 5 carousels and 45 organic posts. Advisor Reels were introduced in Retiro Vertical, Barcco and PAM.
- **Monitoring.** The Mexico campaigns are analysed daily, with new promotional and organic material produced alongside.

2. Clients / projects

A. Pensiones México

What did we do during September?

Date	Main action
4 Sep	Geographic expansion. Pensión 360: whole CDMX in one set (25 miles). Pensionate: CD Juárez 3 circles; Chihuahua expanded from 10 to 12 miles. Nosotros: both halves of CDMX. PAM: new campaign with 3 new Monterrey circles, same materials. Barcco: 3 Monterrey circles. Retiro Vertical: beneficiary verified using Rocío's ID and the paused campaign relaunched.
15 Sep	Return to the July configuration. Barcco relaunched with the July setup, budget reduced from \$300 to \$250/day, 2 ad sets (Monterrey halves, \$150 / \$100), AI post variations, age 58–65+. PAM: new ad account in a new business portfolio inside Pablo's account (same Facebook page), July ad structure, Monterrey \$100 + Border \$100, age 58–65+. Pensionate: July setup (Chihuahua + CD Juárez, \$200, one ad set), age 57–65+, June Reel and July post. Retiro Vertical: 3 campaigns (Mérida, Campeche, Cancún; \$250/3 ≈ \$83 per city), age 57–65+, July Reel. Pensión 360: 2 ad sets covering CDMX halves (\$300), one including Toluca, age 57–65+. Nosotros: July Reel and post, whole CDMX, no Toluca.

Date	Main action
21 Sep	Age raised to 60–65+ across all campaigns, plus location refinement. Retiro Vertical: Mérida (Umán, Komchén, Chablekal, Conkal, Tixkokob), Cancún (Playa del Carmen), Campeche (Samulá, Lerma, China). Nosotros: two ad sets (upper and lower halves). Pensionate: CD Juárez 4 circles. Barcco: two halves of Monterrey (2 + 4 circles). PAM: more bubbles (Border + Monterrey). Prosperar launched in Guadalajara.
25 Sep	Retiro Vertical: Reel replaced with advisor Rocio's Reel in all 3 cities. Pensión 360: Reel updated with a CDMX Reel.
28 Sep	Pensión 360: new campaign testing two Reel angles (CDMX-specific video vs. the earlier mother-daughter Reel), 2 ad sets (20 miles). Retiro Vertical: new campaign with Mérida and Cancún (8 miles) ad sets; Campeche removed; Rocio's Reel. Barcco: 1 ad set covering all of Monterrey, 2 Reels (1 advisor, 1 from July).
29 Sep	Barcco switched to WhatsApp Business (WABA). PAM: 2 ad sets, Monterrey \$150 + Matamoros \$50 (Reynosa and Río Bravo removed), advisor Reel only. Nosotros: 1 ad set (\$250), one large bubble, CDMX Reel.

Problems during the month

- **GHL account configuration.** Seven different Meta business portfolios for the same client were being integrated into one sub-account, which became unmanageable. The setup was split into four sub-accounts, one per advisor (each advisor's Facebook account has its own business page).
- **PAM page in a personal portfolio.** Advisor Jose Luis had created the PAM page in his personal portfolio rather than a business portfolio, so it could not be connected to his sub-account. Resolved by gaining access to the page, creating a new business portfolio inside Pablo's account and assigning the page to Jose Luis, as requested by Mariano.
- **Message and lead drop.** The campaigns were already struggling to generate messages and qualified leads in August. Optimisation continued throughout September, with the major reset on 15 Sep.

Results and comparison with August

Indicator	August	September	Change
Paid reach	358,211	291,478	-18.6%
Paid impressions	1,027,101	825,175	-19.7%
Messages	4,489	3,769	-16.0%
Assigned	40	22	-45.0%
Closures (sales)	8	3	-62.5%
Spend	\$49,520	[\$_____]	[_____%]

Total reach is the sum of each campaign's reach, not the number of unique people reached. [Confirm whether Prosperar is included in the September totals.]

Reach and impressions by campaign

Campaign	Reach Aug.	Reach Sep.	Chg.	Impr. Aug.	Impr. Sep.	Chg.
Pensión 360	86,839	72,687	-16.3%	205,374	156,898	-23.6%
Pensionate	46,274	36,102	-22.0%	161,203	140,325	-13.0%
Nosotros	43,438	37,092	-14.6%	124,702	101,761	-18.4%
Retiro Vertical	54,775	42,979	-21.5%	147,511	126,204	-14.4%
Barcco	66,874	45,628	-31.8%	189,405		
PAM	60,011	56,990	-5.0%	198,906	169,107	-15.0%
Prosperar (new)	—		—	—		—
TOTAL	358,211	291,478	-18.6%	1,027,101	825,175	-19.7%

PAM combines its two ad accounts from 15 Sep (reach 31,742 + 25,248; impressions 80,553 + 88,554; calc.). Barcco September impressions: [confirm figure — campaign notes show 133,888, but the campaign total reconciles with 825,175 only if the figure is 130,880].

Paid Reach by Campaign: August vs. September 2026

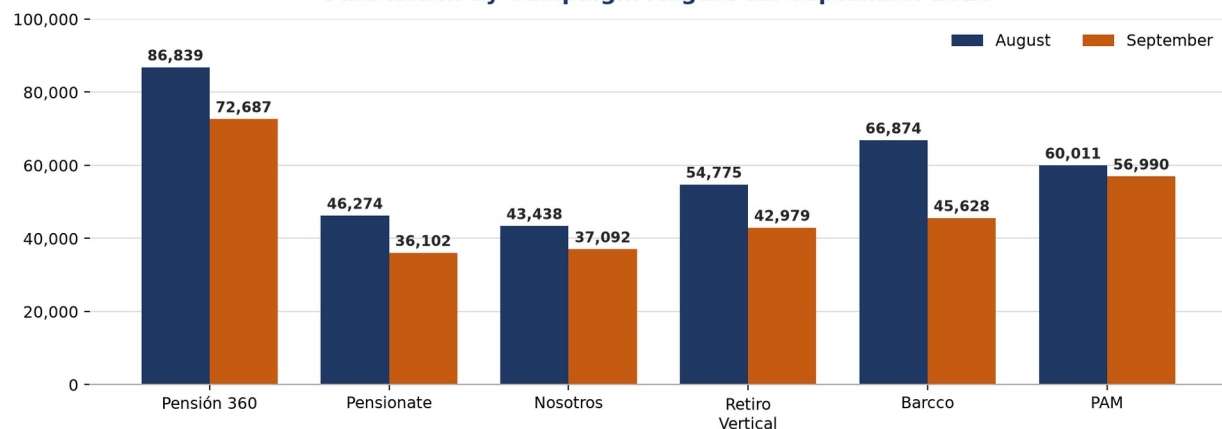

Chart 1. Paid reach by campaign: August vs. September 2026.

Spend by campaign

Campaign	Budget Sep.	August	September	Change
Pensión 360		\$9,068		
Pensionate		\$6,973		
Nosotros		\$7,782		
Retiro Vertical		\$7,448		
Barcco		\$8,980		
PAM		\$9,269		
Prosperar (new)		—		—
TOTAL		\$49,520

Efficiency indicators

Indicator	August	September	Change
Cost per message	\$11.03	[\$]	[]
Cost per assigned	\$1,238.00	[\$]	[]
Cost per closure	\$6,190.00	[\$]	[]
Messages per 1,000 impressions	4.37	4.57	+4.5%
Message → assigned conversion	0.89%	0.58%	-0.31 pp
Assigned → closure conversion	20.0%	13.6%	-6.4 pp
Message → closure conversion	0.18%	0.08%	-0.10 pp

Indicators calculated from the reported messages, assigned, closures and impressions. Cost indicators require September spend.

Analysis and observations

Volume followed delivery. Messages fell 16.0% while impressions fell 19.7%, and messages per 1,000 impressions rose slightly (4.37 → 4.57). As in August, the drop in messages is mainly a drop in delivery rather than in response per impression. [Reason for the lower delivery (e.g. budget changes):]

The main weakness is now downstream. Only 22 of 3,769 messages became assigned (0.58%), and 3 became closures (13.6% of assigned). Unlike August, the assigned → closure stage also weakened. These rates rest on small numbers (22 assigned, 3 closures), so they can move sharply from month to month. [Team explanation for the lower assignment and closure rates:]

Campaign differences. Reach fell in all six continuing campaigns. PAM held best (-5.0%) and Barcco fell most (-31.8%). Pensión 360 remained the highest-reach campaign (72,687). [Messages-by-campaign observations:]

Mid-month reset. On 15 Sep the campaigns were returned as far as possible to their July geographic and creative configuration, and the team reports a significant improvement in message volume afterwards ([1-14 Sep ____ vs. 15-30 Sep ____]). The frequent restructuring (4, 15, 21, 25, 28 and 29 Sep) makes it difficult to attribute changes to any single action. The effect of the 21 Sep age change (60-65+) and of the 28-29 Sep changes has not yet been measured.

B. MÉVIAL

What did we do during September?

- Two promotional videos were prepared.
- No changes were made to the campaign in September, as the team was occupied with Pensiones México.
- **Planned change: switch the campaign CTA to WhatsApp.** This is blocked: the ad account must first be verified (personal or business verification) before the campaign can be optimised or changed.
- **Landing page optimisation in progress:** a more mobile- and user-friendly design that shows less information at once and gives users the option to take the diagnostic or talk to an advisor first.

Production

Videos: 2 promotional ([published / not yet published]) · Other assets: [____]

Results

Indicator	August	September
Campaign status in September	Active (launched 7 Aug)	[active / paused]
Landing page views	3,577	[____]
Investment	€251.56	[€____]
Average cost per view	€0.070	[€____]
Users who started the diagnostic	approx. 1,677	[____]
Users who reached the second step	8	[____]
Contacts recorded in CRM	0 (historical period)	[____]

Comparison with August

[Complete once September results are available.]

Analysis and observations

August's priorities for MÉVIAL (measure the new contact-capture flow and improve the first step of the diagnostic) did not progress in September, as no changes were made to the campaign. Ad account verification is now the step blocking the next change (the WhatsApp CTA).

[Status in September: ____]

3. Overall comparison with August

Indicator	August	September	Change	Abs. Δ
Paid reach	358,211	291,478	-18.6%	-66,733
Paid impressions	1,027,101	825,175	-19.7%	-201,926
Messages	4,489	3,769	-16.0%	-720
Assigned	40	22	-45.0%	-18
Closures (sales)	8	3	-62.5%	-5
Spend	\$49,520	[\$]	[%]	[\$]

The comparison covers the paid campaigns of Pensiones México. MÉVIAL is reported separately.

Overall Performance: August vs. September 2026 — Pensiones México

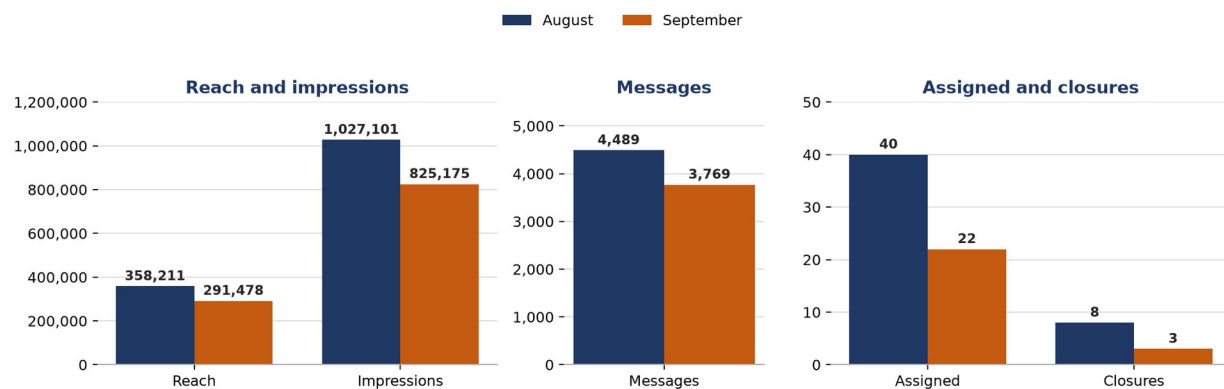

Chart 2. Overall performance: August vs. September 2026 (Pensiones México).

Four-Month Trend: June to September 2026 — Pensiones México

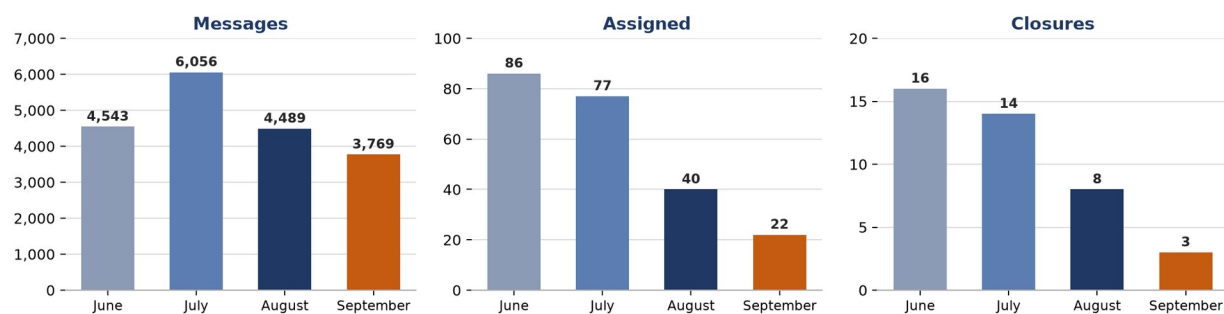

Chart 3. Messages, assigned and closures, June to September 2026 (Pensiones México).

Over four months, assigned fell from 86 to 22 and closures from 16 to 3, while messages peaked in July (6,056).

What changed compared with August, and why?

- **Lower paid delivery.** Reach -18.6% and impressions -19.7%; the most direct cause of lower message volume. [Cause of the lower delivery:]

- **Weaker downstream conversion.** Message → assigned fell to 0.58% and assigned → closure to 13.6%. In August the closing stage had held.
- **Frequent restructuring.** Major rounds on 4, 15, 21 and 28–29 Sep, including the return to the July configuration (15 Sep) and the age range change to 60–65+ (21 Sep).
- **Accounts and channels.** GHL set up as four advisor sub-accounts; PAM moved to a new business portfolio and ad account (15 Sep); Barcco moved to WABA (29 Sep).
- **Retiro Vertical active again** from 4 Sep after verification (it was deactivated on 31 Aug).
- **New campaign Prosperar** (21 Sep). [Contribution in September: _____]

Status of August's objectives

Objective set for September	Status
Complete the transition of campaign management to the four Mexican advisors	[_____] (GHL now organised as one sub-account per advisor)
Implement GHL funnels and automations	In progress: configuration issues; technical support from Andres and Lorgio
Recover at least 25% of contacts who stop responding	[_____]
Develop trust-building and follow-up content	[_____]
Improve conversion from conversations to assigned and closures	Not achieved: message → assigned 0.89% → 0.58%; assigned → closure 20.0% → 13.6%
Maintain at least 40% of July's message volume (~2,400)	Achieved: 3,769 messages (62.2% of July)
Continue testing the strongest creative approaches	Ongoing: advisor Reels introduced; two Reel angles tested on Pensión 360 from 28 Sep

4. What are we currently working on?

- Long-term GHL solution, with technical support from Andres and Lorgio.
- Daily analysis of the Mexico campaigns, with new promotional and organic material produced alongside.
- Returning to the July settings for WhatsApp usage, location and city configuration.
- Optimising the messaging funnel: reviewing the messages and follow-ups being sent.
- Retargeting strategies.
- Evaluating a test budget (reserving part of the budget for testing); at idea stage.
- Results of the 28–29 Sep changes (new Pensión 360 and Retiro Vertical campaigns, Barcco on WABA) are still to be evaluated.
- MÉVIAL: ad account verification and the landing page redesign.

5. Objectives for October

Main objective

[]

Other objectives

- Apply the July settings for WhatsApp usage, location and city configuration.
- Optimise the messaging funnel (messages and follow-ups) to improve message → assigned conversion.
- Develop and test retargeting strategies.
- Resolve the GHL configuration issues with technical support.
- MÉVIAL: complete ad account verification, switch the CTA to WhatsApp and launch the optimised landing page.
- [Numeric targets (messages / assigned / closures):]

6. Supervisor's comments

Problems and risks identified

- **Downstream conversion is the main weakness.** 3,769 messages produced 22 assigned and 3 closures. The closing stage weakened for the first time (20.0% → 13.6%).
- **Four-month decline.** Assigned 86 → 77 → 40 → 22 and closures 16 → 14 → 8 → 3 from June to September.
- **GHL complexity.** Seven business portfolios for one client delayed the funnel and automation work.
- **Asset ownership.** The PAM page had been created in a personal portfolio, which blocked its connection to GHL.
- **Attribution.** Restructuring on six dates in the month makes it hard to know which change worked.
- **MÉVIAL stalled.** No campaign changes in September; ad account verification is blocking the next step.

Proposals and opportunities

- Measure the effect of the 15 Sep return to the July configuration with before/after figures before making further major changes.
- Make changes in fewer, clearly measurable rounds so results can be attributed.
- Focus the messaging-funnel review on the message → assigned step, where most volume is lost.
- Keep all campaign pages inside business portfolios to avoid repeating the PAM access issue.
- Complete MÉVIAL's ad account verification as the first step for that client.

Needs and process observations

- Continued technical support for GHL (Andres and Lorgio).
- [Decision on Dr. Guillermo:]
- [Other needs:]
