Aayush Adhikari

Full-Stack Developer · n8n Automation

Profile

Full-stack developer who builds web and mobile apps end to end and automates business work with n8n and AI.

Full-stack skills

- **Front end:** Next.js, React, TypeScript, Tailwind CSS, Framer Motion
- **Mobile:** React Native, Expo (Expo Router, EAS Build), NativeWind
- **Back end and data:** Node.js, Zod, Supabase (PostgreSQL, Auth, RLS, Storage)
- **CMS, e-commerce and SEO:** WordPress, WooCommerce, technical SEO, Search Console
- **AI, automation and video:** Claude API, Claude Code, n8n, Remotion
- **Hosting:** Vercel, Railway, Cloudflare
- **Also:** Git, GitHub; Word, Excel, PowerPoint and PDF built from code

n8n automations

Self-hosted on Railway. Each one starts from a web form and returns finished files, using Code nodes, AI calls, parallel runs, Supabase tracking and error alerts.

- **Course Builder:** a full training course: plan, slides, scripts, workbooks (live)
- **Process Manuals:** company process manuals, plus a chat assistant in 6 languages (live)
- **Market Research:** research report, action plan and slide deck (live)
- **Economic Study:** economic report in Word with an Excel model (live)
- **Reels Ad Generator:** short video ads for social media (live)
- **Marketing Stage 1:** first step of a 10-stage marketing system (built, not live yet)

Web projects

- casamexicananepal.com: restaurant website with online ordering, ads, pop-ups
- kripacollective.com: WordPress and WooCommerce store, every page editable
- **Client studio:** Next.js and Supabase portal to run the automations and get the files
- **Marketing videos:** ads made with Remotion and Claude Code
